## Dry Laser-Imager

### Fuji Dry Pix 1000

- Manufactured 2003
- Outstanding image quality and reliability in a compact tabletop package. The DryPix 1000 uses Fujifilm's innovative DuraTherm™ thermal head and micro-isolating film technology for consistent high quality images and long life. 8"x10" and 10"x14" films can be printed, making it ideal for distributed CR or printing from a network. The DryPix 1000's compact tabletop design and almost silent operation allow easy placement. A new internal DICOM board facilitates network printing without an external print server.
- Available April 2009
